

Job description

Job Title:	Production Planning Engineer (PPE)
Department:	Operations
Reporting to:	PP&C Team Leader
Location:	Sapirim industrial park, Shaar Hanegev (Near Sapir College, Sderot)
Key Expertise:	Hardware/Electro-mechanical development and manufacturing
Job Scope:	Full-time
Availability:	Immediate

Responsibilities

- To plan, oversee, and improve the organization's production processes to ensure maximum efficiency, quality, and achievement of production targets.
- Build and manage product trees within Priority Software to optimize production planning.
- Analyze and understand production processes, including cost estimation, time requirements, and materials needed.
- Plan and allocate raw materials for various production lines to ensure seamless operation.
- Issue and manage Work Orders and Assembly Certificates in warehouse operations.
- Supervise production lines, including on-site visits, to ensure operational excellence.
- Monitor schedules to ensure timely completion of production targets and adherence to quality standards.
- Collaborate effectively with Procurement, Quality, and R&D functions to streamline and enhance production processes.

Qualifications

- Bachelor's degree in Industrial Engineering, Production Management, or a related field.
- At least two years of experience in planning and managing production processes.
- Specific knowledge and experience with the Priority ERP software.
- Experienced with MS Office, and especially with Project and Excel
- Strong analytical skills and problem-solving ability.
- Good interpersonal skills and the ability to work in a team.
- Close attention to detail and self-motivated
- Proficiency in English - both written and spoken.
